# Nature Identification Days

- | £45 per day
- | £80 both days  
(packed lunches required)
- | £100 for both days  
and overnight stay  
(no meals included)

St Michael's Environmental Education Centre

Join expert Patrick Harding for guided walks into the Peak District National Park to identify trees and fungi, then return to base and learn more about these fascinating examples of nature with illustrated talks.

## Trees

**Saturday 22 October 2016**

10.30am to 3.30pm

Your guided walk will demonstrate how to identify our native trees. Delve into the folklore of these ancient guardians and discover the range of uses for trees from making charcoal to cleaning watches.

## Fungi

**Sunday 23 October 2016**

10.30am to 3.30pm

In this hands-on day you will head off on a fungus foray and learn how to identify and collect fungi. With luck you will find some edible mushrooms and be able to sort them from the toadstools!

## Dr Patrick Harding

Dr Harding has taught throughout Britain, written books on fungi, flowers and trees and leads study tours to Turkey, Finland and the Canaries. He regularly appears on television and gives talks about the natural world.
